## 1.1 Body text

Far far away, behind the word mountains, far from the countries Vokalia and Consonantia, there live the blind texts. Separated they live in Bookmarksgrove right at the coast of the Semantics, a large language ocean. A small river named Duden flows by their place and supplies it with the necessary regelialia. It is a paradisematic country, in which roasted parts of sentences fly into your mouth. Even the all-powerful Pointing has no control about the blind texts it is an almost unorthographic life One day however a small line of blind text by the name of Lorem Ipsum decided to leave for the far World of Grammar.

The Big Oxmox advised her not to do so, because there were thousands of bad Commas, wild Question Marks and devious Semikoli, but the Little Blind Text didn't listen. She packed her seven versalia, put her initial into the belt and made herself on the way. When she reached the first hills of the Italic Mountains, she had a last view back on the skyline of her hometown Bookmarksgrove, the headline of Alphabet Village and the subline of her own road, the Line Lane.

## 1.2 Inline elements

### 1.2.1 Emphasis

Un-emphasised text

*Emphasised text*

**Strongly-emphasised text**

### 1.2.2 Abbreviations and acronyms

SSH is a protocol for establishing encrypted connections between Internet or local network hosts. Connections may be established using IPv4 or IPv6, and SSH clients and servers are available for many platforms, ranging from aged PCs running DOS, through mobile phones, to supercomputers.

### 1.2.3 Code literals

The variable  $x$  denotes the horizontal coordinate in the plot. The formula in `calcpilot()` is used to calculate the value based upon the supplied value of  $y$ : `return cos(2 * y);`

To establish a Secure Shell (SSH) connection to a remote host, one types the `ssh` command at the shell prompt (typically ending with `$`). Alternatively, select the *Terminal → New Remote Connection...* (`Cmd+Shift+K`) menu option.

Once connected, the Message of the Day (stored in `/etc/motd`) is printed, and will typically indicate the version of the operating system running on the host you've connected to, such as `3.2.46-1 x86_64`.

## 1.3 Lists

### 1.3.1 Ordered lists

1. She packed her seven versalia, put her initial into the belt and made herself on the way.
2. When she reached the first hills of the Italic Mountains, she had a last view back on the skyline of her hometown Bookmarksgrove, the headline of Alphabet Village and the subline of her own road, the Line Lane.

3. Pityful a rethoric question ran over her cheek, then she continued her way. On her way she met a copy.
  - a. The copy warned the Little Blind Text, that where it came from it would have been rewritten a thousand times and everything that was left from its origin would be the word "and" and the Little Blind Text should turn around and return to its own, safe country.
  - b. But nothing the copy said could convince her and so it didn't take long until a few insidious Copy Writers ambushed her, made her drunk with Longe and Parole and dragged her into their agency, where they abused her for their projects again and again.
  - c. And if she hasn't been rewritten, then they are still using her.
4. Far far away, behind the word mountains, far from the countries Vokalia and Consonantia, there live the blind texts.
